

The Climate Reality Project, Climate Reality Project Japan, and former US Vice President Al Gore are excited to be hosting a Leadership Corps training in Tokyo, Japan on 6 (in-person) & 13 (online) April. This two-day event is part of “The REALITY® Tour” – a year of trainings and campaigns building global demand for ambitious action to phase out fossil fuels and stop rising temperatures. Join us for two days of discussions with local experts, in-person networking, and a live stream with high-level speakers direct from Paris as we explore what vital work is ahead to phase out fossil fuels and accelerate energy transition. Now is your chance to learn how you can push for ambitious action.

### **WHY ATTEND THE TRAINING?**

- **Communicating Climate.** Watch former US Vice President Al Gore deliver his landmark presentation on climate impacts and solutions around the world, and learn how you too can effectively advocate for change.
- **Compelling Content.** Learn from leaders in the field about issues pertinent to your region and discover how you can drive real progress.
- **Community Building.** Engage with fellow climate advocates during networking sessions – and join other trained leaders to make change in your community through the Climate Reality’s international branch network.

### **WHAT WILL YOU GAIN FROM THE TRAINING?**

- In-depth understanding of the climate crisis and current solutions.
- Effective tools for communicating about the climate crisis.
- Action opportunities through Climate Reality’s global campaigns and branches.
- Building networks and teams interested in climate action in Japan.

*By attending the training, participants will join the Climate Reality Leadership Corps, the nucleus of Climate Reality’s global network of 3.5 million supporters and catalysts for change worldwide.*

### **WHO SHOULD ATTEND THE TRAINING?**

- **Business & Corporate Sector – Decarbonization and Sustainability Professionals or Those Interested.** Business owners, professionals responsible for decarbonization and sustainability within their companies, and those involved in or interested in developing innovative climate crisis solutions.
- **Government & Municipal Officials.** Those who are committed to promoting a just transition and actively providing solutions to communities.
- **Grassroots Activists.** Individuals who want to learn more about the climate crisis, strengthen their campaigning skills, and expand their networks.
- **Young people and students** interested in joining the movement, taking their current efforts to the next level, or developing new advocacy skills.
- **Individuals from impacted communities and all those** compelled to fight for socially just climate solutions.
